

H&W offering Day One support for its SYSB-II software with CICS 6.2

BOISE, Idaho – June 14, 2024 – H&W Computer Systems (H&W) today announced that its SYSB-II® software is covered for Day One support with CICS 6.2, which IBM is releasing today.

“With Day One support, H&W is ensuring that its SYSB-II software will work as expected with the new 6.2 release of CICS,” said Ed Dykes, CTO. “We work closely with IBM to verify compatibility so our customers can upgrade when they need to.”

Companies worldwide – including some of the largest in America – rely on the SYSB-II software to allow CICS to update VSAM files while batch also updates those same files. Due to the importance of this functionality to users, H&W works to stay apprised of new versions of CICS and z/OS on the horizon so it can ensure SYSB-II will integrate with them seamlessly.

About H&W

Headquartered in Boise, Idaho, H&W has been a leading provider of business software solutions to corporations and other organizations since 1979. H&W creates secure, technically sound software that fulfills the needs of both the business units and IT departments of companies.
