H&W offering Day One support for its SYSB-II software with CICS 5.4

BOISE, Idaho – June 16, 2017 – H&W Computer Systems (H&W) today announced that its SYSB-II® software is covered for Day One support with CICS 5.4, which IBM is releasing today.

“With Day One support, H&W is ensuring that its SYSB-II software will work as expected with the new 5.4 release of CICS, even if customers upgrade right away,” said Matt Link, CEO and president of H&W. “This support gives customers peace of mind that they can trust SYSB-II to be there when they need it.”

Companies worldwide – including some of the largest in America – rely on the SYSB-II software to allow CICS to remain online and updating VSAM files while batch also updates the VSAM files. Due to the importance of this functionality to users, H&W works to stay apprised of new versions of CICS and z/OS on the horizon so it can ensure SYSB-II will integrate with them seamlessly.

About H&W

Headquartered in Boise, Idaho, H&W has been a leading provider of business software solutions to corporations and other organizations since 1979. H&W creates secure, technically sound software that fulfills the needs of both the business units and IT departments of companies.
