H&W releases SYSB-II 6.8 with features for improved Control File Management and CICS TS 5.5 support

BOISE, Idaho – April 30, 2019 – H&W Computer Systems (H&W) announced today that it has released its leading SYSB-II software in the 6.8 version, which is focused on enhancing the user interfaces, CICS 5.5 support and security.

“Improving the control file management interfaces has been an ongoing effort for us,” said Matt Link, president and CEO of H&W. “Our customers can select their preferred access method whether it be our CICS, ISPF or web browser interface. These interfaces also embrace a more SYSPLEX friendly view of active subsystems and file sharing jobs currently deployed in their environment. Lastly, we continue to deliver on improved performance for these access methods.”

This release also includes additional functions for VSAM RLS file management, CICS TS 5.5 support, enhanced CICS security processing for both VTAM & TCP/IP communication and added TCP/IP stack selection configuration options.

SYSB-II is mainframe software that allows CICS applications relying on VSAM files to be online 24/7, without downtime to run batch. With SYSB-II, both CICS and batch applications can read and also update VSAM files at the same time, with integrity. This capability allows businesses to process more transactions, offer longer hours of service, and expand to more time zones. Organizations can continue to rely on their trusted CICS applications to provide key services without changing source code or assuming the cost, complexity, and risk of rearchitecting applications and data structures.

About H&W

Headquartered in Boise, Idaho, H&W has been a leading provider of business software solutions to corporations and other organizations since 1979. H&W creates secure, technically sound software that fulfills the needs of both the business units and IT departments of companies. Today, hundreds of corporations worldwide including many Global 500 companies trust H&W for their business software. For more information, visit www.hwcs.com.
